## Nature lessons, in the classroom and outside

### The Bhawanipur Gujarati Education Society School

Students of The Bhawanipur Gujarati Education Society School (The BGES) school got to play with some pet animals in their classrooms. This is desirable and best for students among children, the school principal said. The school organised a pet show on January 18, 20 and 19th in association with COPS Foundation.

It was that time for the students on two days, two weeks, one after, one gathering, two days, one day, one course, one post and one cut were brought to the school for the show and COPS, Son of the foundation.

The school is in the habit of organising events. The children were taught how to take care of animals, care and maintain them, live and like humans. The students were also educated about animals' lives and their rights to be treated with dignity.

The children participated

with them and only made the little ones happy for a few minutes. The children had a meeting with them and the show was held by all.

Teachers have always ways to help students learn, from their activities in class. This year, bringing pets into the school and allowing children to play

### Contai Public School

Students of Contai Public School took part in a nature trail to develop greater awareness and interest towards the primary animal and trees for the planet's sustainable development.

A group of students of Class IX, along with their teachers, took part in a nature trail on Wednesday in the school. The event was organised by the School Inauguration Board in association with the English Science Centre and National Science Camp, Midnapore.

The children were taken to the school's garden and were shown various plants and trees. The teachers explained the importance of plants and trees in maintaining the environment. The children were also taught about the different types of plants and trees and their uses.

The children were also taken to the school's pond and were shown various aquatic animals. The teachers explained the importance of water and the different types of aquatic animals. The children were also taught about the different types of aquatic animals and their uses.
